Environmental Impact Assessment Review
www.elsevier.com/locate/eiar

SUBJECT INDEX FOR VOLUME 26

A

"Adding-up" problem
Can contingent valuation resolve the "adding-up problem" in environmental impact assessment?, 570

Alternative energy
Penetration of hydrogen-based energy system and its potential for causing global environmental change: Scoping risk analysis based on life cycle thinking, 206

Alternatives
Quality control and the substantive influence of environmental impact assessment in Finland, 481

Alternatives
Assessing environmental vulnerability in EIA—The content and context of the vulnerability concept in an alternative approach to standard EIA procedure, 511

ANSEA
Decision-oriented environmental assessment: An empirical study of its theory and methods, 643

Arbitrary and capricious
The influence of incomplete or unavailable information on environmental impact assessment in the USA, 448

Asia
Reconstruction and systemization of the methodologies for strategic environmental assessment in Taiwan, 170

Assessment context
Bridging the gap between theory and practice in integrated assessment, 57

Assessment methods
Bridging the gap between theory and practice in integrated assessment, 57

Assessment process
Bridging the gap between theory and practice in integrated assessment, 57

Auditing
Environmental impact monitoring in the EIA process of South Australia, 426

Autocorrelation
The study of coastal groundwater depth and salinity variation using time-series analysis, 633

B

Biodiversity
Some common shortcomings in the treatment of impacts of linear infrastructures on natural habitat, 257

Biodiversity
Validity and sensitivity of a model for assessment of impacts of river floodplain reconstruction on protected and endangered species, 677

Biodiversity assessment
Biodiversity in environmental assessment—current practice and tools for prediction, 268

0195-9255/$ - see front matter © 2006 Elsevier Inc. All rights reserved.
doi:10.1016/S0195-9255(06)00118-1

Biodiversity impact assessment
Treatment of biodiversity issues in impact assessment of electricity power transmission lines: A Finnish case review, 319
Biological control agent
Biosafety assessment protocols for new organisms in New Zealand: Can they apply internationally to emerging technologies?, 339
BIO-SAFE
Validity and sensitivity of a model for assessment of impacts of river floodplain reconstruction on protected and endangered species, 677
Biosafety protocol
Biosafety assessment protocols for new organisms in New Zealand: Can they apply internationally to emerging technologies?, 339
Birds Directive
Validity and sensitivity of a model for assessment of impacts of river floodplain reconstruction on protected and endangered species, 677
British Columbia
Accounting for social impacts and costs in the forest industry, British Columbia, 139

C

Canada
Time for a new approach to public participation in EA: Promoting cooperation and consensus for sustainability, 185
Causal networks
Causal networks in EIA, 553
CO_2 emissions
Analyzing impact factors of CO_2 emissions using the STIRPAT model, 377
Coastal aquifer
The study of coastal groundwater depth and salinity variation using time-series analysis, 633
Communication
Theoretical reflections on the connection between environmental assessment methods and conflicts, 605
Communication
SEA-Enhancing communication for better environmental decisions, 696
Conceptual framework
Why are natural disasters not "natural" for victims?, 106
Conflict
Theoretical reflections on the connection between environmental assessment methods and conflicts, 605
Content analysis
SEA effectiveness criteria—equally valid in all countries? The case of Italy, 396
Contingent valuation
Can contingent valuation resolve the "adding-up problem" in environmental impact assessment?, 570
Cross-correlation
The study of coastal groundwater depth and salinity variation using time-series analysis, 633

D

Dams
Transboundary EIA: Iberian experiences, 614
Data mining
Causal networks in EIA, 553
Decision-making
SEA – Enhancing communication for better environmental decisions, 696
Decision-oriented
Decision-oriented environmental assessment: An empirical study of its theory and methods, 643

E

EA law
Time for a new approach to public participation in EA: Promoting cooperation and consensus for sustainability, 185

Ecological footprint
Valuation of ecological impacts—a regional approach using the ecological footprint concept, 156
Effectiveness
Quality control and the substantive influence of environmental impact assessment in Finland, 481
Efficiency
Scoping in environmental impact assessment: Balancing precaution and efficiency?, 359
EIA
Scoping in environmental impact assessment: Balancing precaution and efficiency?, 359
EIA
Danish experiences on EIA of livestock projects, 468
EIA
Assessing environmental vulnerability in EIA—The content and context of the vulnerability concept in an alternative approach to standard EIA procedure, 511
EIA
Transboundary EIA: Iberian experiences, 614
EIA
Validity and sensitivity of a model for assessment of impacts of river floodplain reconstruction on protected and endangered species, 677
EIA-screening
Danish experiences on EIA of livestock projects, 468
Electricity power transmission
Treatment of biodiversity issues in impact assessment of electricity power transmission lines: A Finnish case review, 319
Environmental assessment
Environmental assessment in slum improvement programs: Some evidence from a study on infrastructure projects in two Dhaka slums, 530
Environmental assessment
Theoretical reflections on the connection between environmental assessment methods and conflict, 605
Environmental assessment
Decision-oriented environmental assessment: An empirical study of its theory and methods, 643
Environmental decision-making
Assessing environmental vulnerability in EIA—The content and context of the vulnerability concept in an alternative approach to standard EIA procedure, 511
Environmental impact
Indicators validation for the improvement of environmental and social impact quantitative assessment, 79
Environmental impact assessment
Valuation of ecological impacts—a regional approach using the ecological footprint concept, 156
Environmental impact assessment
Biodiversity in environmental assessment—current practice and tools for prediction, 268
Environmental impact assessment
Treatment of biodiversity issues in impact assessment of electricity power transmission lines: A Finnish case review, 319
Environmental impact assessment
Quality control and the substantive influence of environmental impact assessment in Finland, 481
Environmental impact assessment
EIA practice in India and its evaluation using SWOT analysis, 492
Environmental impact assessment
Assessing environmental vulnerability in EIA—The content and context of the vulnerability concept in an alternative approach to standard EIA procedure, 511

Environmental impact assessment
Can contingent valuation resolve the "adding-up problem" in environmental impact assessment?, 570
Environmental Impact Assessment (EIA)
Causal networks in EIA, 553
Environmental Impact Assessment (EIA)
Assessing the performance of SIA in the EIA context: A case study of South Africa, 707
Environmental impact assessment (EIA)
Evaluation of the EIA system performance in Greece, using quality indicators, 242
Environmental impact assessment (EIA)
Environmental impact monitoring in the EIA process of South Australia, 426
Environmental Impact Statement (EIS)
Causal networks in EIA, 553
Environmental impact monitoring (EIM)
Environmental impact monitoring in the EIA process of South Australia, 426
Environmental monitoring
Environmental assessment in slum improvement programs: Some evidence from a study on infrastructure projects in two Dhaka slums, 530
Environmental problems
Environmental assessment in slum improvement programs: Some evidence from a study on infrastructure projects in two Dhaka slums, 530
EU-SEA-Directive
The SEA-Directive and the SEA-Protocol adopted to spatial planning—similarities and differences, 586
Expenses and benefits of SEA
The SEA-Directive and the SEA-Protocol adopted to spatial planning—similarities and differences, 586

F

Flood defence
Validity and sensitivity of a model for assessment of impacts of river floodplain reconstruction on protected and endangered species, 677
Follow-up
Environmental impact monitoring in the EIA process of South Australia, 426
Fragmentation
Some common shortcomings in the treatment of impacts of linear infrastructures on natural habitat, 257

G

GIS-based ecological modelling
Biodiversity in environmental assessment—current practice and tools for prediction, 268
Global change
Penetration of hydrogen-based energy system and its potential for causing global environmental change: Scoping risk analysis based on life cycle thinking, 206
Greece
Evaluation of the EIA system performance in Greece, using quality indicators, 242
Guide land values
Valuation of ecological impacts—a regional approach using the ecological footprint concept, 156
Guidelines and Principles
Principles for social impact assessment: A critical comparison between the international and US documents, 3

H

Habitat
Some common shortcomings in the treatment of impacts of linear infrastructures on natural habitat, 257

Habitats Directive
Validity and sensitivity of a model for assessment of impacts of river floodplain reconstruction on protected and endangered species, 677
Hard look
The influence of incomplete or unavailable information on environmental impact assessment in the USA, 448
Health assessment
Practitioner survey of the state of health integration in environmental assessment: The case of northern Canada, 410
Health integration
Practitioner survey of the state of health integration in environmental assessment: The case of northern Canada, 410
Holistic assessment
Danish experiences on EIA of livestock projects, 468
Hydrogen production
Penetration of hydrogen-based energy system and its potential for causing global environmental change: Scoping risk analysis based on life cycle thinking, 206

I

Impact significance
EIA scoping in England and Wales: Practitioner approaches, perspectives and constraints, 221
India
EIA practice in India and its evaluation using SWOT analysis, 492
Indicators
Indicators validation for the improvement of environmental and social impact quantitative assessment, 79
Indirect environmental impact valuation
Valuation of ecological impacts—a regional approach using the ecological footprint concept, 156
Industrial forestry
Accounting for social impacts and costs in the forest industry, British Columbia, 139
Industrial megaproject
Interpreting major industrial landscapes: Social follow-up on meanings, the case of two aluminium smelters, Alcan (Alma, Canada) and Pechiney (Dunkirk, France), 725
Infrastructure
Environmental assessment in slum improvement programs: Some evidence from a study on infrastructure projects in two Dhaka slums, 530
Integrated impact assessment
Assessing the performance of SIA in the EIA context: A case study of South Africa, 707
Integrated assessment
Bridging the gap between theory and practice in integrated assessment, 57
International Principles
Principles for social impact assessment: A critical comparison between the international and US documents, 3
Italy
SEA effectiveness criteria—equally valid in all countries? The case of Italy, 396

L

Landscape assessment
Interpreting major industrial landscapes: Social follow-up on meanings, the case of two aluminium smelters, Alcan (Alma, Canada) and Pechiney (Dunkirk, France), 725
Landscape meaning
Interpreting major industrial landscapes: Social follow-up on meanings, the case of two aluminium smelters, Alcan (Alma, Canada) and Pechiney (Dunkirk, France), 725

Legal, institutional and procedural frameworks
A review of strategic environmental assessment in 12 selected countries, 15
Legislation
Quality control and the substantive influence of environmental impact assessment in Finland, 481
Life cycle thinking
Penetration of hydrogen-based energy system and its potential for causing global environmental change: Scoping risk analysis based on life cycle thinking, 206
Livestock projects
Danish experiences on EIA of livestock projects, 468

M

Matrix
Reconstruction and systemization of the methodologies for strategic environmental assessment in Taiwan, 170
Method
Theoretical reflections on the connection between environmental assessment methods and conflict, 605
Methodology
Reconstruction and systemization of the methodologies for strategic environmental assessment in Taiwan, 170
Methodology
Interpreting major industrial landscapes: Social follow-up on meanings, the case of two aluminium smelters, Alcan (Alma, Canada) and Pechiney (Dunkirk, France), 725

N

National development plans
Strategic environmental assessment and national development plans in Turkey: Towards legal framework and operational procedure, 301
National Environmental Policy Act (NEPA)
The influence of incomplete or unavailable information on environmental impact assessment in the USA, 448
National legislation
Assessing the performance of SIA in the EIA context: A case study of South Africa, 707
Natura 2000
Danish experiences on EIA of livestock projects, 468
Natural disaster
Why are natural disasters not "natural" for victims?, 106
NEPA
Principles for social impact assessment: A critical comparison between the international and US documents, 3
Northern Canada
Practitioner survey of the state of health integration in environmental assessment: The case of northern Canada, 410

P

Partial least squares regression
Analyzing impact factors of CO_2 emissions using the STIRPAT model, 377
Participation
Scoping in environmental impact assessment: Balancing precaution and efficiency?, 359
Participation
Environmental assessment in slum improvement programs: Some evidence from a study on infrastructure projects in two Dhaka slums, 530
Planning
Assessing social impacts in urban waterfront regeneration, 120
Portugal
Transboundary EIA: Iberian experiences, 614

Potential risk
Penetration of hydrogen-based energy system and its potential for causing global environmental change: Scoping risk analysis based on life cycle thinking, 206
Power lines
Treatment of biodiversity issues in impact assessment of electricity power transmission lines: A Finnish case review, 319
Practice
Environmental impact monitoring in the EIA process of South Australia, 426
Practitioner survey
Practitioner survey of the state of health integration in environmental assessment: The case of northern Canada, 410
Precautionary principle
Scoping in environmental impact assessment: Balancing precaution and efficiency?, 359
Prediction and assessment
Some common shortcomings in the treatment of impacts of linear infrastructures on natural habitat, 257
Prediction tools
Biodiversity in environmental assessment—current practice and tools for prediction, 268
Process review
Treatment of biodiversity issues in impact assessment of electricity power transmission lines: A Finnish case review, 319
Public participation
Time for a new approach to public participation in EA: Promoting cooperation and consensus for sustainability, 185
Project planning and implementation
Environmental assessment in slum improvement programs: Some evidence from a study on infrastructure projects in two Dhaka slums, 530

Q

Quality control
Quality control and the substantive influence of environmental impact assessment in Finland, 481
Quality indicators
Evaluation of the EIA system performance in Greece, using quality indicators, 242
Quantitative tool
Indicators validation for the improvement of environmental and social impact quantitative assessment, 79

R

Rationality
Theoretical reflections on the connection between environmental assessment methods and conflict, 605
Regulation
Biosafety assessment protocols for new organisms in New Zealand: Can they apply internationally to emerging technologies?, 339
Responsibility
Why are natural disasters not "natural" for victims?, 106
River Rhine
Validity and sensitivity of a model for assessment of impacts of river floodplain reconstruction on protected and endangered species, 677
River basin management plans
The Water Framework Directive and the Strategic Environmental Assessment Directive: Exploring the linkages, 287
Road and railway projects
Biodiversity in environmental assessment—current practice and tools for prediction, 268

S

Salinity intrusion
The study of coastal groundwater depth and salinity variation using time-series analysis, 633

Scoping
EIA scoping in England and Wales: Practitioner approaches, perspectives and constraints, 221
Scoping
Scoping in environmental impact assessment: Balancing precaution and efficiency?, 359
SEA
Reconstruction and systemization of the methodologies for strategic environmental assessment in Taiwan, 170
SEA
Strategic environmental assessment and national development plans in Turkey: Towards legal framework and operational procedure, 301
SEA
Validity and sensitivity of a model for assessment of impacts of river floodplain reconstruction on protected and endangered species, 677
SEA effectiveness criteria
SEA effectiveness criteria—equally valid in all countries? The case of Italy, 396
SIA
Principles for social impact assessment: A critical comparison between the international and US documents, 3
Social costs
Accounting for social impacts and costs in the forest industry, British Columbia, 139
Social dimensions
Assessing social impacts in urban waterfront regeneration, 120
Social follow-up
Interpreting major industrial landscapes: Social follow-up on meanings, the case of two aluminium smelters, Alcan (Alma, Canada) and Pechiney (Dunkirk, France), 725
Social impact
Indicators validation for the improvement of environmental and social impact quantitative assessment, 79
Social impacts
Accounting for social impacts and costs in the forest industry, British Columbia, 139
Social impact assessment
Principles for social impact assessment: A critical comparison between the international and US documents, 3
Social impact assessment (SIA)
Assessing social impacts in urban waterfront regeneration, 120
Social Impact Assessment (SIA)
Assessing the performance of SIA in the EIA context: A case study of South Africa, 707
Social psychological impact
Why are natural disasters not "natural" for victims?, 106
South Africa
Assessing the performance of SIA in the EIA context: A case study of South Africa, 707
South Australia
Environmental impact monitoring in the EIA process of South Australia, 426
Spatial planning
The SEA-Directive and the SEA-Protocol adopted to spatial planning—similarities and differences, 586
Spectral analysis
The study of coastal groundwater depth and salinity variation using time-series analysis, 633
Stakeholder involvement
EIA scoping in England and Wales: Practitioner approaches, perspectives and constraints, 221
STIRPAT model
Analyzing impact factors of CO_2 emissions using the STIRPAT model, 377

Strategic Environmental Assessment
A review of strategic environmental assessment in 12 selected countries, 15
Strategic Environmental Assessment
Reconstruction and systemization of the methodologies for strategic environmental assessment in Taiwan, 170
Strategic environmental assessment
Biodiversity in environmental assessment—current practice and tools for prediction, 268
Strategic Environmental Assessment
The SEA-Directive and the SEA-Protocol adopted to spatial planning—similarities and differences, 586
Strategic environmental assessment (SEA)
SEA – Enhancing communication for better environmental decisions, 696
Strong sustainability
Valuation of ecological impacts — a regional approach using the ecological footprint concept, 156
Sustainability accounting
Accounting for social impacts and costs in the forest industry, British Columbia, 139
Sustainability impact assessment
Bridging the gap between theory and practice in integrated assessment, 57
Sustainable development
Time for a new approach to public participation in EA: Promoting cooperation and consensus for sustainability, 185
SWOT analysis
EIA practice in India and its evaluation using SWOT analysis, 492
Slum improvement project
Environmental assessment in slum improvement programs: Some evidence from a study on infrastructure projects in two Dhaka slums, 530
Spain
Transboundary EIA: Iberian experiences, 614
System dynamics
Causal networks in EIA, 553

T

Taiwan
Reconstruction and systemization of the methodologies for strategic environmental assessment in Taiwan, 170
Theory
Decision-oriented environmental assessment: An empirical study of its theory and methods, 643
The Strategic Environmental Assessment Directive
The Water Framework Directive and the Strategic Environmental Assessment Directive: Exploring the linkages, 287
The Water Framework Directive
The Water Framework Directive and the Strategic Environmental Assessment Directive: Exploring the linkages, 287
Time-series analysis
The study of coastal groundwater depth and salinity variation using time-series analysis, 633
Transboundary issues
Transboundary EIA: Iberian experiences, 614
Transgenic plants
Biosafety assessment protocols for new organisms in New Zealand: Can they apply internationally to emerging technologies?, 339
Turkey
Strategic environmental assessment and national development plans in Turkey: Towards legal framework and operational procedure, 301

U

UNECE-SEA-Protocol
The SEA-Directive and the SEA-Protocol adopted to spatial planning—similarities and differences, 586

Urban waterfont
Assessing social impacts in urban waterfront regeneration, 120

V

Validation
Indicators validation for the improvement of environmental and social impact quantitative assessment, 79

Value
Theoretical reflections on the connection between environmental assessment methods and conflict, 605

Victims' perceptions
Why are natural disasters not "natural" for victims?, 106

Vulnerability
Assessing environmental vulnerability in EIA—The content and context of the vulnerability concept in an alternative approach to standard EIA procedure, 511
